

SubBass Doctor 808 Manual

SubBass Doctor 808 is a plugin treating the lowest end of instruments signals.

SubBass Doctor 808's simple user interface easily adapts to your screen – it will be the same size on any screen, whether it is low-DPI or modern high-DPI/retina. Drag the bottom right corner to change the GUI size. Make it smaller to save the valuable screen space, or enlarge it to make it easier to use. Each section is equipped with an independent bypass switch which turns the particular section off.

SubBass Doctor 808 Controls

IN - This control is basically Gain in. Controls how much signal is going in the SubBass Doctor 808 plugin. The range is from -24 to +24dB

OUT - This knob controls the output volume of the whole plugin. Set between -24 and +24 dB.

SAT - Adds parallel saturation for bass frequencies

CURE - Frequency solving of your bass

SUB - SubBass expansion on healthy frequencies

Meters

IN - Indicates the input signal volume.

OUT - Indicates the overall output level.

Right-click

Right-click anywhere in the plugin background with the right mouse button and you will get access to following features.

Change oversampling settings (Plugins that support oversampling only)

Scale GUI precisely by per-cent.

Get the version info.

Access product web page, reach support and access online documentation.

Contact support

Open presets folder (to add, arrange or delete presets manually)

Activate/Deactivate the plugin

Access Licence manager (to activate or deactivate the plugin or several plugins at the same time)

Disable/Enable GPU Acceleration.

Disable/Enable Intelligent sleep on silence function that disables the plugin when no sound is on input or output to save the CPU power.

Right-click any control (knob, button) to access help for the particular parameter.

Double-click Menu

Some parameters let you access more accurate numeric settings by double-clicking the knobs.

Presets and left-right arrows

The plugin comes with a set of presets, which should do the trick for most cases or give you a good starting point when tweaking your sound. Access them using the right and left arrows, or by clicking the preset field directly. You can save and manage your own presets there as well. In your computer, presets are stored in the following paths:

Windows:

C:\Users\username\Documents\SounddeviceDigital\SubBassDoctor808

macOS X:

HOME/Documents/SounddeviceDigital/SubBassDoctor808

Installation and maintenance

Installation is a quick and simple process involving downloading and using a standard installer on both platforms, Windows and Mac OS X. The installer places the plugins and presets into proper locations so that your DAW can easily find it. The plugin is available for all relevant interfaces: VST, VST3, AAX and AU. Note that on OS X since High Sierra you may need to restart your computer to make your DAW find new plugins.

If you find yourself in trouble, please contact us via support@unitedplugins.com.

Updating

Updating the plugin to the newest version is as simple as using the newest installer.

Uninstallation

Windows

You can either use the link to the uninstaller in the start menu by typing SubBass Doctor 808 for example or it can be accessed via Control panels / Applications /

macOS X

First delete the plugin files manually from :

AU: /Library/Audio/Plug-Ins/Components

VST: /Library/Audio/Plug-Ins/VST

VST: /Library/Audio/Plug-Ins/VST3

AAX: /Library/Application Support/Avid/Audio/Plug-Ins

Then if you really want to get rid of all data created by the plugin, remove the following folders as well:

HOME/Documents/SounddeviceDigital/SubBassDoctor808

HOME/Library/Application support/SounddeviceDigital/SubBassDoctor808

Note: Since OS X 10.7 (Lion), many folders are marked as hidden by default. To make them visible again in Finder, please follow this tutorial:

<https://ianlunn.co.uk/articles/quickly-showhide-hidden-files-mac-os-x-mavericks/>

Trial and activation

SubBass Doctor 808 is initially in demo mode, which lets you evaluate the plugin. Try it in your mixing/mastering sessions and make sure it really does the trick. When ready, purchase a licence from our shop or any of our resellers. You will receive a so-called licence file, which you download to your computer. The plugin displays an ACTIVATE button when in trial mode. Click it and select the licence file. The plugin will check the licence and activate the licence on your computer. After you restart your DAW, the plugin will be activated and will work indefinitely without restrictions. You can use the plugin on all your computers.

Support
